**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 5-8 are rejected under 35 U.S.C 112 2<sup>nd</sup> paragraph due to the following:

Claim 3 recites the limitation "said central wall" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "said walls" in line 4. There is insufficient antecedent basis for this limitation in the claim.

*Note: Claims 6-8 depend from claim 5.*

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 3618

2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (Us Patent No.6, 523,641) in view of K.V.Ray (Us Patent No.3, 282,375).

K.V.Ray discloses a first and second wheel bracket assembly, including a bracket (see figure 6, element 32), an axle segment (see figure 6, element 30), a wheel (see figure 6, element 29). The K.V.Ray reference lacks the teaching of a tow bar assembly. Smith discloses a tow bar (see figure 1, element 20a). Based on the teaching of K.V.Ray, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the game cart of K.V.Ray to include a tow bar assembly to permit hauling by an ATV or automobile.

*Regarding claim 1, note that Webster's collegiate Dictionary, 10<sup>th</sup> Edition defines "kit" as "a set of materials or parts from which something can be assembled".*

#### **Allowable Subject Matter**

5. Claims 2,4 and 9-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 3 and 5-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent No. 6, 523,641 issued to Smith teaches Trailer mounted retractable elevated hunting stand.

Us Patent No.3,282,375 issued to K.V.Ray teaches mobile stand for hunters convertible to a hand cart.
